

## Increased Convenience Adds Value for Your Customers

The Aeroneb<sup>®</sup> Pro nebulizer has been validated whereby it can be left in-line in a mechanical ventilation circuit for up to 7 days without rinsing\*.

Your customers can benefit immediately from the increased convenience of leaving the Aeroneb<sup>®</sup> Pro nebulizer in-line for up to 7 days, thereby:

1. Enabling a fully closed ventilation circuit
2. Providing added protection against infection
3. Eliminating the need for manual rinsing after each dose

This latest feature of the Aeroneb<sup>®</sup> Pro nebulizer is sure to be of significant relevance to your existing Aeroneb<sup>®</sup> Pro users and should help you in your endeavors to win new customers.

Please ensure your sales team is informed about this latest update whereby they can duly inform their customers.

For any questions in relation to the above, please contact Gail Molloy at +353 86 832 0898 and [gmolloy@aerogen.nektar.com](mailto:gmolloy@aerogen.nektar.com) or Jeremy Newell at +44 1865 292 018 or [jnewell@aerogen.nektar.com](mailto:jnewell@aerogen.nektar.com)

Thank you for your continued support.

\*The in-line study was validated using **albuterol sulphate** only. Aerogen recommends that cleaning, disinfection and sterilisation of the Aeroneb<sup>®</sup> Pro Nebulizer are carried out in accordance with current hospital procedures
