

# Preassembled breathing circuit sets for HAMILTON-G5/S1

## Single use, for adult and pediatric patients

- Coaxial breathing circuit available in two lengths
- Proximal flow sensor and expandable expiratory tube
- Expiratory valve set (optional)

PN 260184

## Your benefits at a glance

- ✓ Increased efficiency and safety as supplied assembled ready to use
- ✓ Compact single limb design allows for clearer patient space
- ✓ Reduced risk of cross infection as circuits are single use
- ✓ Greater time and cost efficiency as reprocessing is eliminated
- ✓ Optimal positioning thanks to expandable expiratory tube
- ✓ Coaxial design provides passive warming of inspiratory gasses by heat exchange with expiratory flow
